

Publish Your Audiobook with Fayda Digital: Your Guide to Success

At Fayda Digital, we provide independent publishers and authors with an exclusive opportunity to bring their auditory narratives to a global audience. If you possess an audiobook you'd love to share, we're thrilled to help you connect with eager listeners around the world. We have curated a detailed roadmap below to help you understand our approach towards accepting, reviewing, and publishing audiobooks.

Stage 1: Submitting and Initial Review

The process starts with your audiobook submission. We warmly welcome all types of content, be it ready-to-publish or in its nascent stages of development. Our seasoned review panel meticulously goes through each submission to determine its quality, relevance to our audience, and potential success on our platform.

Please note that professionally produced and ready-to-publish content naturally receives immediate attention. However, we value potential as much as polish. Should your audiobook be in draft form yet show strong promise, we are eager to nurture its development.

Stage 2: Editing and Refinement Process

If your audiobook requires refinement, our expert team steps into action. We strive to enhance the overall audio quality, articulation, and delivery, making sure your content delivers an outstanding listening experience. During this phase, we ensure that your audiobook aligns with the highest quality standards without losing its unique auditory charm.

Stage 3: Publishing and Distribution

Once your audiobook meets our quality standards, it is all set for publishing on the Fayda Digital App. Our user-friendly platform ensures a seamless listening experience for our users. Your captivating narratives will be just a few taps away, allowing users to download your audiobook and embark on an auditory journey.

Royalties and Compensation

We, at Fayda Digital, strongly believe in recognizing and rewarding our authors for their creativity and hard work. Therefore, we offer a royalty scheme for all audiobooks that exceed a length of 3 hours. The royalties are calculated based on the number of downloads from our app. The specifics of these royalties are negotiated individually, ensuring a transparent, fair, and mutually beneficial agreement.

In conclusion, Fayda Digital is dedicated to transforming your audiobook from a simple audio file into an immersive auditory experience for listeners worldwide. Our streamlined process, from submission to potential editing and ultimately publication, is designed to support you every step of the way. Add to this our royalty scheme, and you have a platform that truly values and rewards your creative endeavors. Submit your audiobook to Fayda Digital today and let your voice resonate globally.
